APPLICATION

- *Anti-counterfeit, preventing files (data, documents, picture files) from copying;
Working with special CD-players and special PCs and CDs;
Encrypted contents to be combined with RFID;
File data to be opened only after authorization;
Games to be opened and used only after authorization;
- *Used as a general admission ticket, with functions of visit times deduction, anti-counterfeit and copying prevention;
Able to save all the activities in which you have participated, adding memorial value;
- *Examples applied in market:
 - Scenic spots in every province (introduction to scenic spots and contents of scenic spots);
 - Introduction and game schedule of 2008 Olympic Games in Beijing;
 - Diversified shows in China
(each show description and the customers participating in such shows as car show, electric products show, smart cards show and etc.);
 - International professional conferences (The proposals discussed and contents of conferences are saved in CDs.)
 - World Cup Football Game (famous football players and the files of memorable pictures);
 - Introduction to the contents of each history museum or exhibition hall;
 - Each large concert or performance;
 - World Cup Game (memorable data of all famous players)
- *Make sure to add the functions of chip and coil on CD.
When a CD spins at a very high speed (i.e. starting CD-play), the chip or coil won't get damaged or damage the CD-player, and won't influence the quality & quantity of CDS or the normal operation of the player either.
- *Quality assurance is so strict that it has been certified by RITEK Corporation, one of the largest CD manufacturers in the world.
- *The packing and production technology has obtained certification and patents from Europe, America, Japan and Korea.
